

Ray Velasquez

BIOGRAPHY

Ray Velasquez brings a fresh perspective and passion for learning to the waterworks and irrigation industry. With a Bachelor of Arts in Chinese Studies from Pacific Lutheran University and a decade of military experience culminating as a Special Forces Team Leader, Ray has lead small teams to solve difficult problems everywhere from Afghanistan to Singapore. At Cimco-GC Systems, he has swapped his knowledge of military planning and Mandarin-Chinese for automatic control valves and acoustic leak detection technology. Ray helps consult engineers and water operators on new projects and has spent extensive time in the field with Cimco-GC System's service team working on water systems across the Pacific Northwest. Ray spends his free time at the drop zone where he is a licensed skydiver, across the city on his road bike, or hiking in the mountains.
