

“Overview of Laboratory Accreditation & Compliance”

ONLINE Workshop

This 3 hour “Laboratory Accreditation & Compliance” online training explains the laboratory accreditation process and what is required to stay compliant with the laboratory accreditation program.

Analytical data produced for regulatory compliance must meet many state and federal requirements. Analyses for compliance purposes must be conducted by accredited laboratories and regularly demonstrate their qualifications and performance.

Our **“Laboratory Accreditation and Compliance”** workshop explains the overall requirements for laboratory accreditation.

We will point out what information you will have to prepare and submit with your application and how you can demonstrate your lab’s capabilities and performance.

We will provide real life scenarios to describe the challenges commonly observed during accreditation and audits of laboratories performing compliance testing.

This **“Laboratory Accreditation & Compliance”** live online workshop will provide you with an essential understanding of the laboratory accreditation process and how to remain compliant with these requirements.
