Summary of Lesson Content At D.P. Nicoli, Inc your safety is our first concern. In our pursuit of your safety and those around you, DPN offers Competent Person Training. This class offers Supervisors, Foreman, and Laborers training of OSHA'S Subpart P which outlines terms and definitions of trench excavation, soil analysis, proper shoring and shielding installation, benching and sloping charts as well as general jobsite safety and duties of a competent person. This class is presented by using PowerPoint, videos, and supporting materials such as the Subpart P handbook in a format where attendees interaction in necessary.

A course typically takes 4-6 hours and we provide everyone with a card to put in there wallet stating they have taken the course.

Professional Background: (Note a brief – 2 page maximum – resume may be submitted in lieu of the following data. Please be sure the resume includes all requested information. Qualifications should be related to your presentation.) Use the reverse side of this form if more room is needed to fully answer the following questions.

I have worked at D.P. Nicoli Inc. for 5 years as shoring specialist with a heavy focus on safety and shoring rules and regulations. I have taught over 35 classes for small to large excavation companies throughout Northwest Oregon and Southwest Washington and continue to grow that number and educate. I have gained my knowledge through working for construction companies in my younger years as well as being in the field 5 days a week in my current position visiting with customers and seeing their jobsites and providing shoring solutions for their excavations. After graduating from Oregon State University I knew safety in the construction industry was a field I wanted to work in and feel very fortunate I work for company and be in a position where safety is our main focus.
