Saltese Flats Wetland Tour	12:30pm	4:30pm	4	2

## Exhibit Hall Tours by Discipline

1.0 training hour (more information TBA)

### In-person/Virtual/Hybrid

Pacific Northwest Clean Water Association (PNCWA) invites you to join us for the 88th Annual PNCWA Conference in Spokane, Washington, September 11-14, 2022. After a hiatus in 2020 due to the COVID 19 Pandemic, the conference returned in 2021 with both an in-person conference in Boise Idaho, as well as a virtual conference for those not able to travel. This year we intend to build upon that success with continued opportunities for in-person learning and networking, combined with virtual content as a means of reaching the broadest possible audience as we strive to bring you the region's largest water quality educational event of its kind.

For 2022, we plan to “Be Like Water: Adapting with Purpose”, moving fluidly and flexibly past obstacles and adapting with purpose to the world around us. One thing we’ve all learned over the last several years is how to be more flexible, to take challenges and make them opportunities, so we look for your help this year and in the years to come as we make this a reality for our clean water industry.

PNCWA is pleased to provide a limited virtual registration option for those who won’t be joining us in person this year, as well as an add-on option for those in-person attendees who wish to earn additional CEU credits post-event.

This virtual component will include 3 full-day live streams of the in-person conference beginning on Monday, September 12th through Wednesday, September 14th where virtual attendees will be able to watch the sessions at the same time as our in-person attendees via the conference platform. That's 60+ sessions of content and nearly 40 CEUs (pending approval)! We will host a variety of presentation topics throughout the live streams, and a full list of sessions will be announced shortly.

Once the in-person event is complete, PNCWA will host the recorded live-streamed sessions for viewing in the conference platform. Pending approval, CEU credits are applicable both for sessions live-streamed or attended in-person during the conference as well as those viewed post-event. The content will be available on-demand post-event.
