

Wastewater Treatment Fundamentals II – Solids Handling and Support Systems

Online Course, Exam & Book

File Attachment Index and Additional Notes

Attachment 1 – Course Description & Details

Attachment 2 – Chapter Summary & Time Allotments

Attachment 3 – Course Analysis and Course Comparisons

Attachment 4 – Beta Testing Results

Attachment 5 – List of Contributors

Attachment 6 – Contributors Resumes & Bios

This file contains biographical information about the group responsible for creating, reviewing and testing this course. It serves to represent the level of knowledge and experience associated with this program.

Attachment 7 – Sample Completion Certificate

Attachment 8 – **Online Course Access**

This file contains login details giving state reviewers access to online course and related materials.

Attachment 9 – WEF Continuing Education Program Overview

ADDITIONAL NOTES:

Clients are able to access this course through a single user access code that is provided upon purchase. All participation and exam results are tracked electronically through the web-based system.

WEF has determined a total of 60 hours or 6.0 CEUs for this course based on the average time our beta testing group spent on each chapter. In addition, we considered that most clients will be using the course in conjunction with a print book and will be cross referencing each medium. Our beta testers represent a wide range of backgrounds and experience levels, while we believe our primary audience is an entry to mid-level operator. Operators must complete the final exam at a passing rate of 70% or higher to gain credit for taking this course. The final exam is made up of 100 questions which are randomized based on chapter size out of more than 350 total possible questions.
