

I appreciate you working with us on this approval. Based on your request, we've attached the specific files you've requested. In addition, we have supplied a link to the entire set of materials that we have been presenting to states for review.

This is the second in a series of online courses designed to assist Professional Operators with the first three levels of certification examinations. We submitted the initial course in this series, WWTF I, to your office for review in 2019. We are also asking for approval of both the online course and for the hardcopy book with access to the online final exam, with the understanding that they may not be eligible for the same number of credit approval hours.

Wastewater Treatment Fundamentals II: Solids Handling and Support Systems Online Course, Exam & Book

Below you will find the link to view and download files pertaining to this course and to access the course using a state review or audit account. If for any reason you are unable to view these files using our SharePoint system, please contact me to receive files by email. As part of our ongoing WEFeco initiative we have made it a goal to reduce our carbon footprint by eliminating unnecessary paper use whenever possible.
