Maintaining Compliance for Drinking Water Utilities in Oregon

Session 1.

Preparing for a Water System Survey (AKA Sanitary Survey):

This workshop provides an overview of the purpose and intention of a water system survey for drinking water systems in the state of Oregon. It is intended to provide a water operator and/or utility manager what to expect and how to best prepare for a water system survey in order to best meet compliance with regulatory agencies.

Learning Objectives:

At the completion of this lesson, participants should have the ability to:

- 1. Describe what a water system survey is and it's intended purpose.
- 2. The elements of a water system survey
- 3. How to prepare for the survey (Covid protocols, records needed, portions of the field inspection)
- 4. What is considered an Outstanding Performer

Session 2.

Water Quality Sampling

This workshop provides an overview of the purpose and parts of a sample site plan. It will also discuss proper sample collection procedures as well as the reasons for inaccurate results.

Learning Objectives:

At the completion of this lesson, participants should have the ability to:

- 1. General knowledge of sample collection procedures and equipment needed.
- 2. Identify factors, conditions and common issues that can lead to inaccurate results when collecting samples.
- 3. Recognize challenges in collecting valid samples.
