

Umpqua Community College Online Courses

Course Timeline

Course is an eleven-week online offering without specific meeting times. The course has been approved by the Umpqua Community College administration and by the State of Oregon Higher Education Coordinating Commission (HECC) as a 3-credit course. The college counts this as 3 hours of contact time per week plus study time necessary to successfully complete the course. Course requires weekly submittal of graded math assignments, and quizzes. Students are required to participate in a weekly online discussion forum in which instructor-assigned topics are discussed and points-of-view defended. Instructor participation and/or feedback occurs with all required activities and assignments.

Course Attendance

Because the course does not have specific meeting times, attendance and participation are tracked by timely submittal of work products, participation in discussions, grades, and the instructor's use of the CANVAS online system's student activity tracking system.
