

## "Wastewater Process Control Optimization & Troubleshooting" Online Workshop

March 16th, 2023

**Live Online** 

Instructor: Ryan Hennessy

## **Agenda**

| Time         | Material Covered  |
|--------------|---|
| 12:00 - 2:00 | Common Problems and Potential Solutions: Biological Wastewater Treatment Processes: |
|              | Filamentous bulking and floc structure characteristics                              |
|              | Slime bulking   |
|              | Pin floc  |
|              | Denitrification   |
|              | Dispersed growth  |
|              | Limited nutrients   |
|              | Foaming   |
|              | Inhibition / Toxicity   |
| 2:00 - 2:15  | Break   |
| 2:15 - 3:15  | DNA Usage and Application in Biological Wastewater Treatment:                       |
|              | Genotype versus phenotype   |
|              | Notable limitations of microscopy   |
|              | Notable limitations of DNA sequencing (16S rRNA)                                    |
|              | qPCR testing functionality  |
|              | Personal applications and thoughts  |
| 03:15 PM     | Adjourn   |
