

Cybersecurity Assessment Training for Public Water Systems Webinar

Sponsored by U.S. Environmental Protection Agency

The U.S. Environmental Protection Agency (EPA) will be hosting a two-part webinar series for Public Water Systems (PWS) on how to begin building a resilient cybersecurity program by providing systems with information and resources on how to conduct cybersecurity assessments and address vulnerabilities. PWS staff are encouraged to attend both Part One and Part Two of the series.

PWS staff will receive a detailed walkthrough including but not limited to:

- ✓ How to conduct a cybersecurity self-assessment and identify vulnerabilities;
- ✓ How to develop risk mitigation plans to prioritize, address, and mitigate the vulnerabilities found during the assessment;
- ✓ Share resources EPA has developed to assist PWSs in assessing cybersecurity practices as well as additional public and private-sector resources available;

Cybersecurity subject matter experts will be on hand to address questions at the conclusion of each presentation.

Continuing Education Units:

Applications for all 50 states for all water operators to receive continuing education units (CEUs) for participating in the training have been applied for. Check the registration pages for the most up to date list of state CEU approvals.

Questions:

Registration related questions or issues registering can be directed by email to: *Natasha Rae, Horsley Witten Group (EPA Contractors)* at: EPA@horsleywitten.com.

Sanitary survey cybersecurity related questions can be directed by email to: *Cole Dutton, Cybersecurity Specialist, U.S. EPA, Water Infrastructure and Cyber Resilience Division* at: Dutton.Cole@epa.gov.
