

Water Sources

Learning Objectives

Scope

This course is presented in three separate lessons.

The first lesson dives into the wonders of the hydrological cycle.

The second lesson provides essential information and concepts regarding the use of groundwater as a source of water supply.

The third lesson focuses on surface water sources and the challenges of storing, treating, and delivering a safe and adequate supply for this important resource.

Training Methods

Our training methods that will be applied, are interactive learning through the videos displayed on our website, WaterLMS. Attendees will have to take quizzes and tests, as well as being interactive throughout the whole duration of the course. They can not skip forward, and is required to be active for the duration of the course, being able to get the full experience out of our courses and prepare them for the real duties they will encounter.

Courses can be taken in a learning plan, all together or be taken individually.
