

[ACR] Abnormal Operating Conditions

Learning Objectives

This course focuses on problems that might arise from using pumps

- Outline the process of analyzing a problem situation associated with a centrifugal pump
- Utilize a process to identify and troubleshoot problems caused by vibration
- Utilize troubleshooting steps to inspect and analyze bearings running hot

Training Methods

Our training methods that will be applied, are interactive learning through the videos displayed on our website, WaterLMS. Attendees will have to take quizzes and tests, as well as being interactive throughout the whole duration of the course. They can not skip forward, and is required to be active for the duration of the course, being able to get the full experience out of our courses and prepare them for the real duties they will encounter.

Courses can be taken in a learning plan, all together or be taken individually.
