

[ACR] Centrifugal Pump Repair

Learning Objectives

This lesson examines the causes of centrifugal pump damage and outlines removal and installation methods of new components.

- Identify safety procedures used in isolating pump repair
- Identify causes of damage to pump components
- Describe methods for removal and installation of pump components
- Define methods and measurements used in pump alignment

Training Methods

Our training methods that will be applied, are interactive learning through the videos displayed on our website, WaterLMS. Attendees will have to take quizzes and tests, as well as being interactive throughout the whole duration of the course. They can not skip forward, and is required to be active for the duration of the course, being able to get the full experience out of our courses and prepare them for the real duties they will encounter.

Courses can be taken in a learning plan, all together or be taken individually.

Course Content

- Centrifugal Pump Repair

Course Outline

1. Centrifugal Pump Repair	2 hrs
Self- Paced	Total 2 hrs
