

WW: Introduction to Wastewater

Learning Objectives

Welcome to this course on the characteristics of Wastewater. In this course, and in fact this entire text, reference will be made to wastewater and sewage. These terms are interchangeable. However, the term wastewater is a broad, descriptive term. Generally, it includes liquids and water containing solids from homes, businesses, and industry and is a more “modern” term.

Training Methods

Our training methods that will be applied, are interactive learning through the videos displayed on our website, WaterLMS. Attendees will have to take quizzes and tests, as well as being interactive throughout the whole duration of the course. They can not skip forward, and is required to be active for the duration of the course, being able to get the full experience out of our courses and prepare them for the real duties they will encounter.

Courses can be taken in a learning plan, all together or be taken individually.
