

Hazardous Waste Management for Drinking Water Utilities – Waste Determinations, Handling, Storage, and Accumulation Times

Learning Objectives

This is the second module of a five-part series. By the end of this module, students will be able to make a waste determination using a Safety Data Sheet (SDS) or waste characterization analysis method. Then, students learn how to properly handle, store, and accumulate hazardous waste. Finally, students learn about the different hazardous waste generator statuses and what the generator status means for drinking water utilities.

Training Methods

Our training methods that will be applied, are interactive learning through the videos displayed on our website, WaterLMS. Attendees will have to take quizzes and tests, as well as being interactive throughout the whole duration of the course. They can not skip forward, and is required to be active for the duration of the course, being able to get the full experience out of our courses and prepare them for the real duties they will encounter.

Courses can be taken in a learning plan, all together or be taken individually.

Course Content

- Course Introduction & Instructor Information
- What Are the Course Objectives?
- What is SDS?
- What Waste Characterization Should I Use?
- Break for Exam #1
- Exam #1
- What is a Hazardous Waste sticker?
- Exam #2
- General Course Survey

Course Outline

1. *Hazardous Waste Management for Drinking Water Utilities – Waste Determinations, Handling, Storage, and Accumulation Times* 2 hrs

Self- Paced

Total 2 hrs

Student Assessment

Upon class completion, students will be tested using an open question & answer session, to ensure there is a general understanding of the materials presented during the course.

Instructor Bio:

Is strictly online, so no instructor is needed.

Please reach out if you have any questions, or is wanting to take the course yourself, to provide a better understanding of the ones we provide.
