

Hazardous Waste Management for Drinking Water Utilities – Universal Waste & Hazardous Materials Business Plan

Learning Objectives

This is the last module of a five-part series. In this module, students learn how to identify universal wastes and the requirements for universal waste generators including handling, storage, accumulation time, transportation, and record-keeping. Then, students are introduced to hazardous materials business plan requirements including what it is, what it contains, and if students need one at their facility.

Training Methods

Our training methods that will be applied, are interactive learning through the videos displayed on our website, WaterLMS. Attendees will have to take quizzes and tests, as well as being interactive throughout the whole duration of the course. They can not skip forward, and is required to be active for the duration of the course, being able to get the full experience out of our courses and prepare them for the real duties they will encounter.

Courses can be taken in a learning plan, all together or be taken individually.
