SPEAKER CREDENTIALS (Short paragraph describing background, education, experience, etc.)

National Well Services Director for Shannon and Wilson. He has more than 34 years of water supply development and ground water management experience. His water resource work has focused on municipal water supply including water rights, well design/construction, and evaluation of well performance issues. He is a nationally recognized expert in the area of well development and rehabilitation, and a frequent speaker at workshops on well performance and rehabilitation throughout the U.S. and Canada.

Title and Length of Class:

Improving Well Performance with Science Based Approaches

Description of Class:

Long term well performance is dependent on many factors that begin with how the well is constructed, and later how it is operated and maintained. This presentation will touch on the key factors that impact well performance including:

- Key well design and Development Factors
- Understanding mechanism of well screen and filter pack clogging
- Recent Research related to well rehabilitation methods
- Rehabilitation process more important than method

Scott Berry

OAWU Circuit Rider

sberry@oawu.net

SPEAKER CREDENTIALS

(Short paragraph describing background, education, experience, etc.)

Scott Berry has been employed by the Oregon Association of Water Utilities since 2004 as a Training Specialist, Circuit Rider/Programs Manager. In this capacity, Scott was tasked with providing training and technical assistance to many utilities in Oregon. Scott has additional experience as the Manager of Luckiamute Domestic Water Cooperative. LDWC is a geographically large system with a distribution area of over 265 square miles. He worked as an operator in Iraq where he provided the U.S. military bases as well as native towns and villages with much the same service as provided by OAWU. In Iraq he gained experience as a Reverse Osmosis Water Treatment Plant Operator as well as troubleshooting, maintaining, and installing water distribution systems. Additionally, Scott has been involved and trained with the local Fire Department and County Sheriff's office in all aspects involving emergencies and hazardous operations.

SPEAKER

Name: Steve Causseaux

Employer: CIMCO – GC Systems

Address: 2315 Inter Avenue

City/State/Zip: Puyallup, WA 98372

Phone: 253-845-4050

Email: steve@cimcosales.com

SPEAKER CREDENTIALS

(Short paragraph describing background, education, experience, etc.)

A native to the Pacific Northwest United States, Steve has spent the past 13 years working in water management for irrigation, waterworks, and construction projects. As an environmental consultant for 4 years in the Arizona deserts, he worked with most major home builders during the housing boom of 2003-2008 to control sediment, pollutants, and erosion which lead to contamination of desert waterways and ground water during construction. As a current consultant with CIMCO, an independent representative firm in the Pacific Northwest and Canada, Steve continues to source conservation innovations for water distribution and irrigation. Over time, Steve has noticed a perception that control valves are very complicated. This is not the case. His introductory training will help operators understand the basics with the hope (as they continue their training) that they will become comfortable managing control valves on a daily basis. Steve resides in Vancouver, WA and especially loves the rainy winters in the Pacific Northwest where he enjoys navigating the raging rivers, creeks, and waterfalls in his kayak.

SPEAKER

Name: Greg Chase
Employer: Portland Engineering, Inc.
Address: 2020 SE 7th Ave.
Phone: 503-256-7718
Email: gchase@portlandengineers.com

SPEAKER CREDENTIALS

Greg Chase is a Project Manager for Portland Engineering, Inc. (PEI) with over 25 years of experience in Construction Management and Industrial Control System Integration. Greg has experience and has worked on projects from all angles: Design packages, Owner's Representative, General Contracting, and Sub-Contracting. His project management expertise covers water and wastewater treatment plants, power generation facilities, commercial and residential development, historic restoration, industrial conversion, and education facilities. He has extensive experience working with a variety of facilities and is able to blend the needs of owners, managers, designers, and users to deliver optimal solutions in form, fit, and function.

Greg has knowledge of what is required to develop project requisites, schedule, and budget. He also knows how to take a project through the design process, bidding, construction, move-in, and project close-out stages. From a project management standpoint, Greg regularly builds successful project teams, an important and often overlooked key to final delivery. In addition to Project and Construction Management, Greg is an expert in emerging and contemporary technologies relating to SCADA design, Telemetry, HMI applications, Network Security, and project delivery.

PEI is a systems integration engineering firm providing superior engineering and systems integration services to our industrial and municipal partners throughout Oregon, Washington, California, and the greater Pacific Northwest. PEI is a registered systems integrator for Wonderware, Allen-Bradley/Rockwell Automation, Matrikon, Ignition, and InduSoft, and works with all major brands of automation hardware and software. PEI has been in the automation industry for over twenty years providing clients with an in-depth knowledge of older systems ~~up to and~~ through today's latest technology.

PEI engineers have experience in a wide range of industrial, commercial, and municipal fields providing our clients with the process experience required to develop the best solutions. Projects include complex and critical controls on systems where efficiency, safety, and reliability are essential and where data management expertise helps bring clients the real-time and historical data they need to operate their systems effectively while improving their processes.

At PEI, we provide complete, professional engineering services that range from assessments and preliminary design ~~up to and~~ through startup and commissioning. PEI offers full lifecycle support, from 24-hour on-call field service through complete design/build solutions for large, complex projects. PEI provides flexibility in service delivery and integrates efficiency and value engineering into all projects in the most practical, reliable, and economical manner possible.
