

DAVID KAHN, CIH

A: 3829 SE Salmon St. Portland, OR 97214

PROFESSIONAL EXPERIENCE

Forensic Analytical Consulting Services (Portland, OR)

Senior Project Manager (June 2017–January 2023)

- Act as technical leader for the Portland branch of an industrial hygiene and public health consulting company.
- Partner with clients to identify health and safety challenges and provide data-driven solutions that protect health and safety, minimize liability, and meet or exceed Federal, State, and Local regulatory requirements.
- Trained clients and staff on the requirements of health and safety programs and on OSHA standards. Topics include hazardous chemicals, HAZWOPER, respiratory protection, hazard communication, and more.
- Lead industrial hygiene evaluation projects with budgets ranging from \$3,000 to over \$1 million, including developing scopes, estimating budgets, coordinating stakeholder schedules, conducting assessments, interpreting data, and delivering reports.
- Conduct industrial hygiene assessments of physical, chemical, and biological hazards and design and recommend hazard controls based on assessment findings.
- Provide expert testimony in construction defect litigation.
- Write health and safety plans for compliance with State and Federal OSHA standards including topics such as chemical hygiene, environmental health and safety, lead and asbestos, hearing conservation, hazard communication, and COVID-19.
- Adapt to the requirements of different clients including government agencies, construction sites, educational institutions, medical facilities, residential properties, industrial sites, maritime businesses, and commercial facilities.

Millenium Consulting Associates, Inc. (Oakland, CA)

Project Professional (August 2014–June 2017)

- Provided industrial hygiene consulting to governmental, educational, medical, and private clients to protect worker and public health and safety and support compliance with OSHA and EPA regulations.
- Train and supervise junior personnel in hazardous material surveys and abatement oversight.
- Performed indoor air quality investigations, water quality testing, and subsurface soil sampling.
- Evaluated worker exposures to a variety of chemical hazards to protect worker health and safety and comply with OSHA regulations.
- Conducted hazardous materials testing, design, and abatement oversight services as part of management teams for projects with budgets ranging from \$100,000 to greater than \$1 billion.
- Developed proposals for industrial hygiene consulting projects including scope of work documents and cost estimates.
- Managed consulting projects from one-day surveys to multi-year assessment, design, and abatement oversight packages with contract values from \$2,000 to \$200,000.
- Lead inspection teams performing building inspections for hazardous materials.
- Wrote technical reports documenting hazardous material surveys and making recommendations for hazardous material handling in compliance with applicable laws and regulations.
- Wrote contract specifications for hazardous material abatement projects in compliance with both client and regulatory requirements.

Envirosurvey, Inc. (San Francisco, CA)

Environmental Consultant (March 2011–August 2014)

- Trained contractors at the OSHA awareness level in lead and asbestos safe work practices.
- Performed industrial hygiene oversight of hazardous materials abatement contractors to enforce safe work practices and document compliance with hazardous materials regulations.
- Collected data from jobsites and laboratories and synthesize into technical reports and letters for layperson clients.

- Field managed \$1.5 million site soil characterization project.
- Cooperated with clients to plan and schedule projects and reported technical project findings.
- Conducted hazardous materials surveys, soil sampling, water sampling, and air sampling projects.
