(4 hours Water and Wastewater)

Class: Math for Operators

Relevancy: Water and Wastewater

Date: Recurring, various, ongoing dates.

Location: Various

Instructor: Hans Schroeder, Scott Berry, OAWU

Outline: This class will be a condensed version review of the understanding of basic math concepts and formulas for water and wastewater operators for system operations.

8:00-10:00 (0.2)  
Applied math principles in utility operations, including fractions, percentages; basic algebra and proportions.

10:00-10:15 Break

10:15-12:15 (0.2)  
Questions & answers of mathematics use for water treatment problems; water distribution problems, wastewater collection problems, wastewater treatment problems.
