

”Disaster Resiliency for Water & Wastewater Operations - What does that mean?”

Workshop

This 7 hour in-person **”Disaster Resiliency for Water & Wastewater Operations - What does that mean?”** workshop will provide you with a fundamental understanding of all-hazards emergency management systems and their application in the water and wastewater industries. What does that mean?

We will explain:

- What you should address and what requirements you have to meet
- What is the National Incident Management System (NIMS)
- What is the Incident Command System (ICS)
- How does the Emergency Cycle work
- The importance of identifying roles & relationships in Emergency Management
- Why we need to “exercise” our Emergency Management Plan
- What resources are available to help you with your emergency planning and management
