City of Stayton Water & WW Plant Profiles June 6th
2024

RSVP

Please RSVP

Metzel@aumsville.us

We need to have an accurate count for lunch so please let us know if you can make it.

We hope you can join us for our first Plant Profile of 2024! The City of Stayton is hosting a tour and plant overview of both the Water and Wastewater facilities June 6th, 2024, 10:00am. Free lunch will be provided for all attendees and 0.2 CEU's for Water and Wastewater are pending approval by OESAC.

Information about the Facilities

Wastewater Treatment Facility

The Wastewater Treatment Facility is located on Jetters Way in Stayton. It treats all the wastewater received from residential commercial and industrial customers via the collection system pipe network. The wastewater collection system carries sanitary sewerage from sinks, tubs, toilets, and other household and commercial building drains to the Wastewater Treatment Facility.

Water Treatment Facility

The Water Department provides water treatment and delivery of clean drinking water to residential, commercial, and industrial customers. Fresh water is delivered from the Santiam River via the power canal, into the City's slow sand filtration system. Once the water is treated, it is then delivered to residential, commercial, and industrial customers through 44 miles of water distribution lines.
