

"All about Valves used in Water & Wastewater Treatment" Live Online Workshop

This 7 hour IN-PERSON training will offer a broad overview of the types of valves used in the treatment of water and wastewater. It includes how to identify most common valves, valve actuators, and their intended purpose.

In this "**All about Valves used in Water & Wastewater Treatment**" workshop we will discuss:

- the principles of how the valve works
- how to identify most common valves, valve actuators, and their intended purpose
- how the valve is operated via SCADA by a valve actuator
- water hammer
- friction loss
- valve coefficient.
