

CEU Instructor Background

(7 hours – Wastewater O&M)

Class: Ebara Pumps Americas Corp. Pump Maintenance & Troubleshooting

Relevancy: Wastewater

Date: July 18, 2024

Location: Canby, OR

Instructor: Mike Panther

Summary: I have been in the water & wastewater industry for over 32 years providing sales & training to not only sales personnel, but also to the municipal/industrial operations and maintenance staff. My experience comes from factory direct experience for over 32+ years.

I have worked for two pump manufacturing companies, Vaughan Chopper Pumps and Ebara Pumps America Corp., where I was in engineering and technical sales and support for their pumping products. The pumps in these two companies were vast, and mostly centrifugal pumping technology for solids handling applications. During my time with Vaughan Pumps, I performed countless training and technical sessions to distributors and representatives on a global level.

Employed at Vaughan, I was able to get vast knowledge of the centrifugal pump and mixing technologies used in the wastewater markets. I've spent 27+ years training staff, teaching service schools, and the distribution network on chopper pumps and mixing systems. Vaughan is a manufacture of centrifugal chopper pumps and hydraulic mixing systems.
