

"A Practical Overview of Collection Systems" Workshop

This **3-hour LIVE ONLINE "A Practical Overview of Collection Systems"** workshop will provide a basic overview of collection system maintenance and operation.

We will address:

- sewer cleaning, nozzle selection, and cleaning methods
- sewer inspections, both active and new construction
- sewer system rehabilitation and sewer system repair
- basic lift station operation and maintenance, pump curves, pumps, and motors, VFDs, valves, and associated equipment
- confined space entry, equipment, and procedures as they apply to working in the collection system
