

# "Drinking Water Filtration Basics" Workshop

Filtration is widely applied in groundwater as well as surface water treatment. Filtration is not only used for sediment removal, but also to treat for contaminants such as arsenic, metals, uranium, organics, and more. Treatment technologies include various types of media filtration systems, membrane filtration, and reverse osmosis.

In this **3 hour online "Drinking Water Filtration Basics" workshop** we will explore the principles, technology, and operation of the following filtration systems:

- Media filtration
  - Sand
  - Anthracite
  - Carbon
- Membrane Filtration
  - Micro
  - Nano
  - Ultra
- Reverse Osmosis / Desalination

**Where:** Live online

**Date:** 01/22/2025

**Time:** 8:00am to 11:15am PT

**Instructor:** Rusty Goss

**Fee:** \$100

**Registration:** online: [www.pro-train.org](http://www.pro-train.org); phone: (360) 490-2426; email: [erika@pro-train.org](mailto:erika@pro-train.org)

**Contact:** [erika@pro-train.org](mailto:erika@pro-train.org) or (360) 490-2426
