

# Solving the Nitrogen Problem

Across the United States, nutrient discharges from wastewater systems are being regulated at an increasing rate. Decentralized wastewater treatment systems can provide better, more reliable solutions for reducing nutrients through biological processes. In this webinar, we'll discuss the use of Orenco treatment technologies for reducing nitrogen and other nutrients of concern.

## Agenda

5 min – Intro and housekeeping

45 min – Presentation

10 min – Q&A

Total – 60 min
