City of Aumsville Treatment Facility

RSVP
Please RSVP To
Metzel@aumsville.us

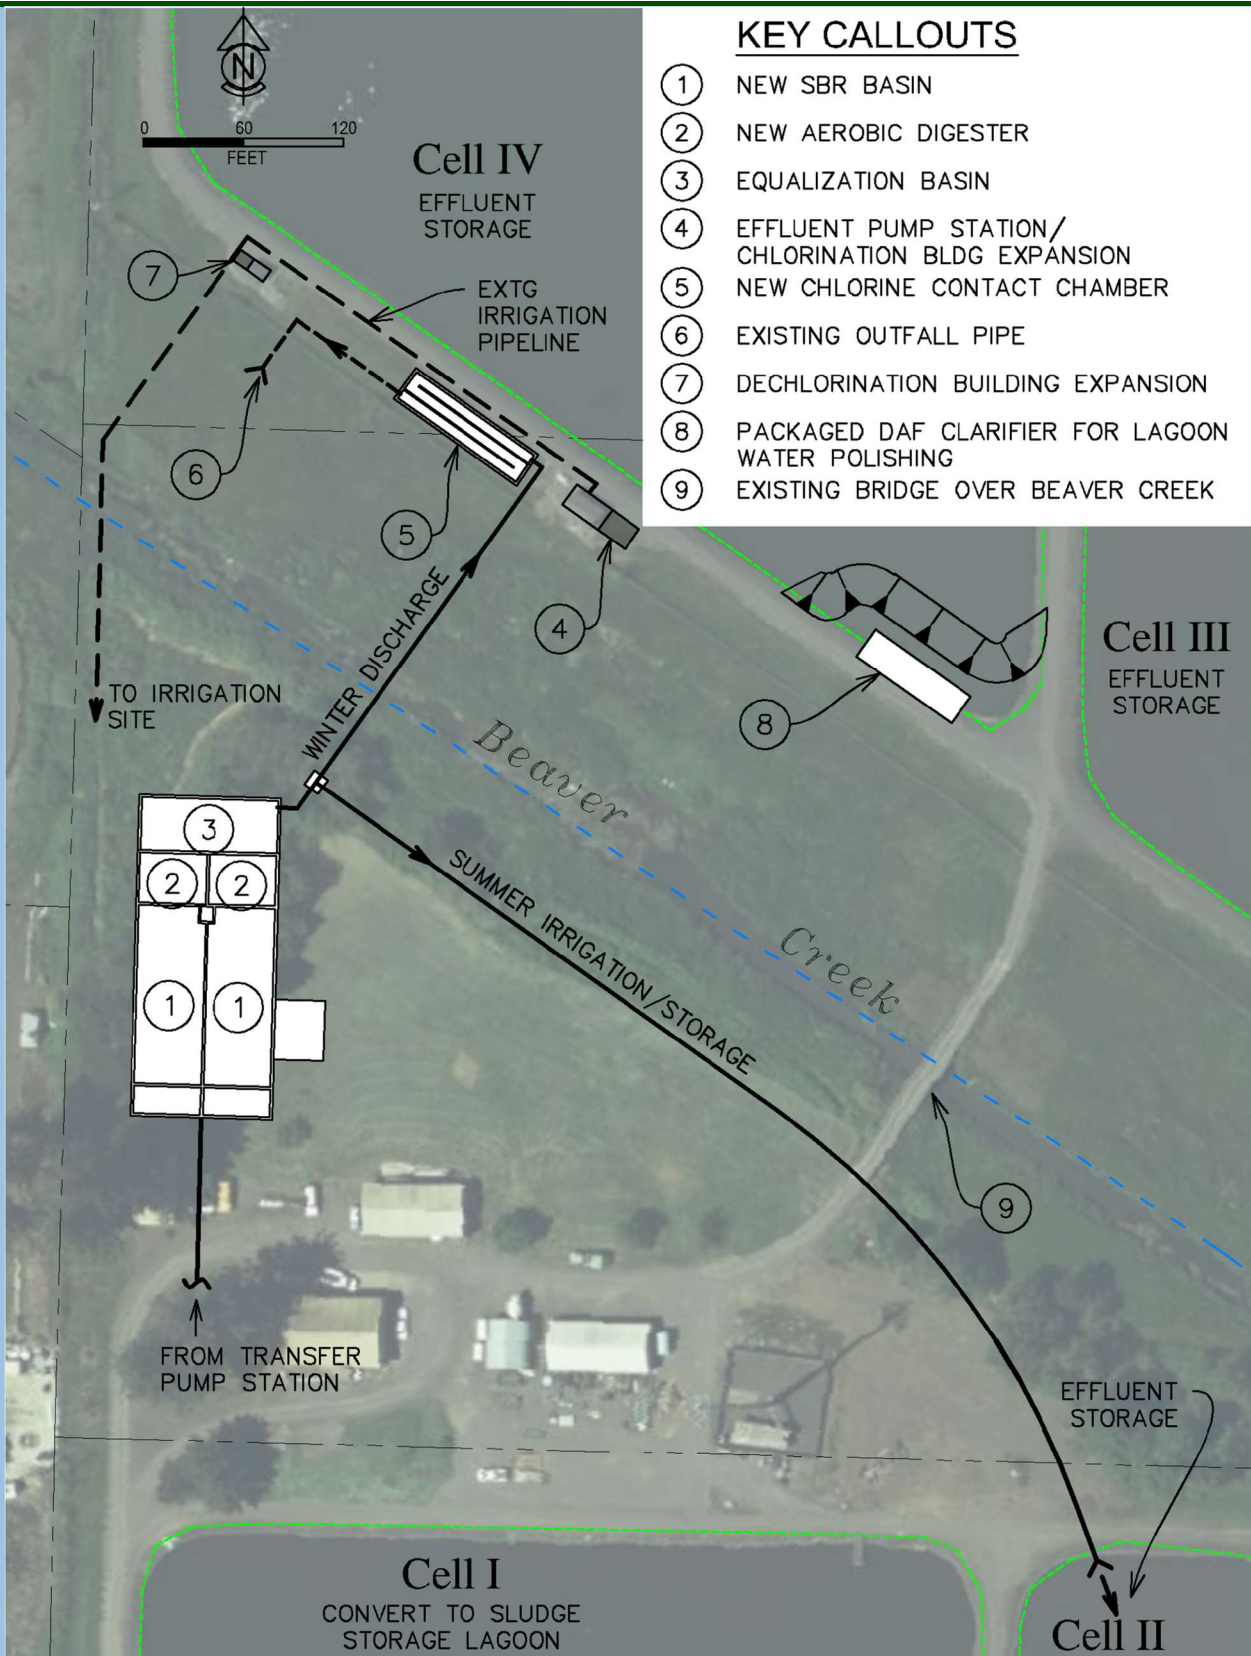

We need to have an accurate count for lunch, so please let us know if you can make it.

We hope you can join us for a presentation on the operation of the Aumsville Treatment Facility, followed by a tour and Q&A session with the operators of the facility. 02 WW CEUs Provided!

Information about the Facility

The City of Aumsville is currently operating an aerated lagoon wastewater treatment facility. Our average dry weather flows are around .300 MGD, and winter wet weather peak flows can be above 2 MGD. The City of Aumsville operates on a winter discharge permit to Beaver Creek and a summer discharge permit to a city-owned reuse site.

In 2021, the City of Aumsville received a renewed permit with a compliance schedule for new ammonia limits. The City of Aumsville plans to build an SBR and DAF treatment facility to meet the current permit and compliance schedule requirements. Design by Westech Engineering is nearly complete, and the project is scheduled for construction in 2026. Come hear our story about how we were able to secure funding for the project, and make this a success story rather than a burden on the community.

Please visit our website for upcoming classes, events, and job openings.
