

Instructor Bio – Sara Hammons

I am currently an Engineer II in the Operational Analysis section of the Operations Group at the Portland Water Bureau. I have 19 years of experience in the Water Bureau, with the recent 15 years being in the Operations Group and the 4 years prior to that in the Engineering Group. In my current position, I run the hydraulic network water system model to perform hydraulic analysis, including shutdown reviews, support field staff, and explain water system operation to Water Bureau staff, consultants, and others. I have a bachelor's degree in mechanical engineering from Oregon State University and am a registered Professional Engineer in Oregon.
