

WQT 260 Water Treatment Systems Course Timeline

This course is an eleven-week online offering without specific meeting times. It requires weekly submittal of graded written assignments, math assignments, and quizzes. Students are required to participate in a weekly online discussion forum in which instructor-assigned topics are discussed and points-of-view defended. Instructor participation and/or feedback occurs with all required activities and assignments. The course does not have specific meeting times, attendance and participation are tracked by timely submittal of work products, participation in discussions, grades, and the instructor's use of the CANVAS online system's student activity tracking system.
