

Collection Operator 3 & 4 Review & Exam Prep Workshop

Professional Training Association is excited to announce we are now offering a **2-day IN-Person “Collection Operator 3 & 4 Review & Exam Prep” workshop.**

Wastewater operations do not start at the wastewater treatment facility but include the sewer collection system, which consists of conveyance pipes, pumps, and lift stations. Many of the problems we encounter in the wastewater treatment plant also cause headaches in the collections systems. Grease build-up, debris blocking screens, root penetrating pipes and tanks, grid build up, pump failure, increased flow, etc. are only a few of the challenges collection systems are dealing with on a daily basis.

Our **2-day IN-PERSON “Collection Operator 3 & 4 Review & Exam Prep” workshop** provides you with 14 hours of class time and is an excellent tool to help you prepare for your upcoming Collection Operator exam level 3 or 4.

We will review routine, advanced, and complex processes, functions, operations, components, equipment as well as math encountered in collection systems. We will also provide you with lots opportunities to practice exam style questions. After completing this training, you will be better prepared for what to expect from the exam. You will also be able

to determine which areas you may want to focus on during your study efforts while continuing your exam preparations.

In this workshop we will:

- Review:
 1. The principles and advanced processes of collection systems operations.
 2. Commonly encountered components and equipment, including their operation, maintenance, & troubleshooting.
 3. Challenges encountered in collection systems.
 4. Biological, chemical, or physical parameters frequently monitored in collection systems.
 5. Sample collection procedures.
 6. Safety hazards.
- Explain how to understand and answer word problems.
- Address math formulas as they apply to collection systems.
- Provide many opportunities to practice exam style questions.
- Share tips for how to prepare yourself for the exam.
- Explore test taking techniques.
