Inspection and Maintenance of Wastewater Pumps

Course title: Inspection and Maintenance of Wastewater Pumps

Drinking Water CEUs: 0 h

Wastewater CEUs: 1.0 h

Instructor bio: With a background in electromechanical engineering, **Christian CALON** began his career as an operator in a water and wastewater utility. He then became a professional trainer in water and wastewater systems, specializing in pumping. Later, he joined the Compagnie des Eaux et de l'Ozone (Water and Ozone Company), starting as a Regional Technical Director before advancing to lead the national research unit. After the company merged with Veolia, he was appointed as the leading expert in pumping systems.

Course description: This course covers the monitoring of wastewater pumps, as well as flow and level measurement techniques and maintenance guidelines for wastewater pumping systems. It also explains the most common pump problems, such as clogging and cavitation, providing practical precautions to prevent or minimize these problems.

Learning goals:

- Monitor different wastewater pumps
- Identify the different maintenance guidelines for wastewater pumping systems
- Carry out maintenance checks on wastewater pumping systems

Tracking attendance method:

The e-learning platform offers a highly interactive experience designed to engage learners at every stage. It begins with an initial test to assess knowledge and tailor the learning journey. The course includes short, focused videos interspersed with mandatory training quizzes that reinforce key concepts and ensure active participation. Students are required to watch every video entirely and to answer practice questions before advancing to the next course module. Students cannot skip course content. A final quiz at the end of each chapter evaluates overall comprehension and certifies the learner's mastery of the material. Students must obtain a minimum score of 70% for every chapter's final quiz to successfully complete the course and obtain the certificate of attendance. The platform automatically tracks each learner's learning time. The real learning time is indicated alongside the delivered credits in the course completion certificate.

Course outline: Inspection and Maintenance of Wastewater Pumps

Initial Test		8 min
1. Wastewater Pumps: Inspection and Maintenance	1.1. Course Overview	2 min
	1.2. Monitoring Wastewater Pumps	4 min
	1.3. Flow Measurement in Wastewater Treatment	7 min
	1.4. Level Measurement Devices in Pumping Stations	6 min
	1.5. Maintenance Guidelines for Wastewater Pumping Systems	5 min
	1.6. Chapter 1 - Fact Sheets	4 min
	Chapter final test	6 min
2. Procedure for Collecting Data on Drinking Water and Wastewater Systems	2.1. Clogged Wastewater Pumps	5 min
	2.2. Cavitation in Wastewater Pumps	5 min
	2.3. Course Glossary	3 min
	2.4. Chapter 2 - Fact Sheets	2 min
	Chapter final test	3 min
Total Learning Time		60 min
Requested Contact Hours		1 h
