Bruce Cassem has 15 years of experience completing Environmental Health and Safety project development, environmental audits, and training development and implementation. He develops custom-tailored training for 24 and 40-Hour HAZWOPER training, annual HAZWOPER refreshers, and can train on multiple field safety topics and other OSHA-required programs. Bruce is our main instructor for EPA/OHA accredited lead inspector/risk assessor training, and has written and reviewed Health and Safety Plans (HASPs) and Job Safety Analysis (JSA) for multiple clients. As an American Red Cross instructor, Bruce has trained over 200 individuals in CPR/First Aid/AED.

RELEVANT PROJECT EXPERIENCE

Training Instructor and Course Developer. Bruce is instrumental in the development and delivery of Apex's hazardous materials and lead-based paint training programs. He provides ongoing updates to course curriculum and researches industry best practices to continuously provide high-quality instruction.

24-Hour Initial HAZWOPER Training and 8-Hour Refresher Training, Metro, Portland and Oregon City, Oregon. Co-developed and delivered custom HAZWOPER training to Metro staff that included the foundation in general HAZWOPER principals, modules, and exercises designed to address the specific hazards and procedures in each Metro working environment.

Emergency Response Team Training, Metro, Portland and Oregon City, Oregon. Developed and delivered custom 8-hour Emergency response team trainings to Metro transfer station staff. Training includes review of Metro Transfer Station Emergency Response Plan procedures and hands-on exercises including simulated spill responses. New topics and exercises were developed each year to respond to the current hazards and challenges of each Transfer Station environment.

24-Hour Initial HAZWOPER Training and 8-Hour Refresher Training, BPA, Portland, Oregon, and Vancouver, Washington. Bruce provides BPA with custom, HAZWOPER training designed to support the varied roles of BPA employees.

NW Natural HAZWOPER Training Services. Bruce works closely with NW Natural staff to provide onsite 40-Hour HAZWOPER training and 8-Hour HAZWOPER Refresher training for NW Natural staff.

Health and Safety Training Services, Marion County Public Works, Salem, Oregon. Bruce worked on the Apex team that provided Marion County with a core curriculum for custom tailored training for a wide variety of topics including bloodborne pathogens, confined space entry, lockout/tagout, excavations and trenching, hazard communication and hazard identification, respiratory protection, forklift certification, and more. His role also included the review of OSHA regulatory topics, and frequent discussions with Public Works' safety specialists and other key staff.

Health and Safety Training Services, City of Port Orchard Public Works, Port Orchard, Washington. Lead trainer providing custom-tailored training programs for Public Works crews. Requested training included First Aid/CPR/AED, fall protection, confined space entry, lockout/tagout, bloodborne pathogens, and excavation and trenching competent person.
