

JULY 23RD 2026

TILLAMOOK COUNTY CREAMERY ASSOCIATION PLANT PROFILE

About the Plant

The Tillamook Creamery, also known as the Tillamook Cheese Factory, has its own Wastewater Treatment Facility. The plant averages 0.6 MGD. The loading averages 3500 mg/l of BOD. TSS averages 1100 mg/l. The Creamery has its own WWTP and NPDES permits. The effluent from the facility is discharged to a private wetland owned by the creamery, and then makes its way to the Wilson River. They have a self-reporting lab and employ 4 licensed operators and 1 lab technician. The plant runs 24/7 365. Cows don't know about holidays!
