

OESAC Submittal, Temp ID 13789

ACWA Annual Conference

July 15-17, 2026

Bend, Oregon

Correct description: Thursday, July 16, 3:00 – 4:00 pm

DEQ Water Quality Manager Forum

This panel will provide an opportunity for a deeper discussion into key water quality program areas, including permitting, Total Maximum Daily Loads (TMDL), water quality standards, assessment, permit-related data management, biosolids, recycled water and reuse, and Clean Water State Revolving Fund (SRF) topics. Designed as an interactive discussion, the session will be moderated to encourage attendee questions, with participant interests and questions being central to the discussion. Bringing together experts from multiple water quality programs in one session will help attendees better understand how these programs connect and allow attendees to strategically and more broadly understand how to address requirements across multiple water quality programs.

This description replaces the one that was previously submitted.

Thank you,

Peggy McCormick
