WORK HISTORY

Full-time Faculty **Clackamas Community College** **2016 – Present**

Lead Instructor for the Wildland Fire Management, Forestry Wilderness Survival, Emergency Management and Geographic Information Systems Program.

- Development and delivery of student-centered experiences that promotes learning
- Plans learning experiences with intent of assisting students in meeting course/curriculum outcomes
- Participation in evaluation of student learning and performance

Wildland Fire Protection Supervisor **Oregon Department of Forestry** **2014 - 2016**

The primary purpose of this position is to supervise coordination of the necessary field activities to meet fire program objectives on the unit or district through collaboration with cooperators and local and federal agencies. This position supervises employees engaged in field activities accomplishing prevention, pre-suppression, suppression, and ensures maintenance of equipment and facilities to support accomplishment of program objectives.

- Provides oversight and program management of pre-suppression/readiness by planning, coordinating, conducting and leading projects such as live fire training, water hole development, etc. Maps and maintains water source locations.
- Oversees initial attack and extended attack resource readiness and response. Locates fires using forest maps, compass, global positioning systems and directs resources to fire location. Orders detection flights.
- Functions as Incident Commander or Division Supervisor to make assignments of personnel and fill in for resource shortages.
- Conducts initial fire size-up assessments, determines firefighting resource needs, and orders appropriate resources.

Emergency Management Specialist II **Div. of Homeland Security & Emergency Management** **2012 - 2014**

Emergency Management Specialists work with a variety of local, state, and federal agencies to guide and coordinate planning and preparation for disasters and other large scale events impacting public health and safety; consult with local governments and response organizations to provide technical assistance in identifying actions that will reduce the risk from hazards or threats; participate in event response to identify the need for, direct, and coordinate state involvement; assist local governments and the public in applying for state and federal funding for mitigation, planning, response, and recovery operations; and monitor performance, authorize payments, and report on state and federal emergency management grants.

- Community Planner focused on Emergency Operations Plans, Evacuation Plans and Rural Emergency Planning issues to create community equity and resilience.

- Fulfill the role of Planning Section Chief, Operations Specialist, Resource Unit Leader and Situations Unit Leader in the State Emergency Operations Center and as a field coordinator and disaster responder.
- Project Manager for the Hazardous Materials Emergency Preparedness grants Program.
- Assist in managing the Emergency Management Program Grant and Local Emergency Planning Committee Grant.

Adjunct Faculty

University of Alaska Anchorage

2013 - 2014

Instruct for the Fire and Emergency Services program. I delivered the Principles of Emergency Management course in the fall of 2013. This was an online or at-a-distance delivery.

Course Description:

Course examines the history of emergency management. Identifies and determines risk assessments for natural and technological hazards. Identifies and assesses the disciplines of emergency management. Examines international disaster management, emergency management and terrorism, and discusses the future of emergency management.

Fire Training Administrator

Division of Fire & Life Safety, State of Alaska

2012

Fire Training Administrators are responsible for the administration of fire suppression training and certification programs, policy and budget development, grants administration, curriculum development, interagency liaison and staff supervision. Incumbents develop the training schedule, monitor course content and evaluate instructor expertise, ensuring that training meets established standards. Through the technical assistance program for fire departments and rural communities, Fire Training Administrators evaluate local fire protection systems and make recommendations for improvement.

- Develop and implement multiple fire service training programs for fire service agencies and organizations statewide.
- Determine training needs; research and develop curriculum.
- Determine standards and certification requirements; and oversee accreditation and certification programs.
- Write course outlines and guides, texts and training materials.
- Perform administrative duties including preparation and control of budgets, contracts and agreements; is responsible for grants administration, including issuing awards; inventory maintenance and property control.
- Supervise the training staff; make assignments of training activities, locations and schedules. Monitor and evaluate staff and their training activities.
- Serve on related professional advisory committees and provide liaison, coordination and assistance to fire protection organizations in developing training programs, budgets, legislation and local fire protection plans.

Emergency Management Specialist II Div. of Homeland Security & Emergency Management 2011 - 2012

Emergency Management Specialists work with a variety of local, state, and federal agencies to guide and coordinate planning and preparation for disasters and other large scale events impacting public health and safety; consult with local governments and response organizations to provide technical assistance in identifying actions that will reduce the risk from hazards or threats; participate in event response to identify the need for, direct, and coordinate state involvement; assist local governments and the public in applying for state and federal funding for mitigation, planning, response, and recovery operations; and monitor performance, authorize payments, and report on state and federal emergency management grants.

- Community Planner focused on Emergency Operations Plans, Evacuation Plans and Rural Emergency Planning issues to create community equity and resilience.
- Fulfill the role of Planning Section Chief, Operations Specialist, Resource Unit Leader and Situations Unit Leader in the State Emergency Operations Center and as a field coordinator or disaster responder.
- Project Manager for the Hazardous Materials Emergency Preparedness grant Program.
- Assist in managing the Emergency Management Program Grant and Local Emergency Planning Committee Grant.
