

Connor Gilham

Connor Gilham, EIT, is a Systems Engineer with Orenco Systems, a company based in Sutherlin, Oregon, that engineers and manufactures innovative infrastructure solutions. In this role, he provides assistance (including hydraulic grade line analysis), customer service, and support to commercial wastewater engineers and system designers in the southeastern United States. He also frequently helps with the start-up process for Orenco's AdvanTex Treatment Systems. His previous job experience involved work with raw water clarification, filtration, ion exchange, and reverse osmosis.

Connor holds an associate's degree from Chemetka Community College and a bachelor's degree in environmental engineering from Oregon State University. In his spare time, he enjoys playing slow-pitch softball and remodeling and landscaping his home. His goal is to become more self-sufficient through hunting, fishing and gardening.
