THE HISTORY OF THE UNITED STATES

1776

The American Revolution was a struggle for independence from British rule. It began in 1775 and ended in 1783. The Continental Congress declared independence on July 4, 1776. The war was fought between the Continental Army and the British Army. The Continental Army was led by George Washington. The British Army was led by General Lord Cornwallis. The war ended with the signing of the Treaty of Paris in 1783. The United States was recognized as an independent nation.

The United States was founded on the principles of liberty and justice for all. The Constitution of the United States was written in 1787. It established a federal government with three branches: the executive, the legislative, and the judicial. The executive branch is headed by the President. The legislative branch is headed by Congress. The judicial branch is headed by the Supreme Court. The United States has since become a world superpower.
