

Timeline: A one hour webinar, live airing from 12:00 PM to 1:00 PM, but available on demand on our website for any time after the initial presentation

Agenda: Attached is the Power Point for the webinar as a PDF showing the agenda

Method of tracking audience: Zoom meeting attendance is tracked and can be confirmed after the meeting. After the live airing the webinar can be requested via our website after giving name and email information.

Synopsis: In the seventh COVID-19 webinar, Laura Schroeder and Catherine Hansford explain the basic steps in determining the value of water rights. The webinar will be held on May 27, 2020 from 12:00 PM to 1:00 PM. [Click here to register](#). First, participants learn the different water right components that might either add value to your home, farm, commercial operation, or provide separate value if severed to transfer for a different use. Secondly, the presentation will explain what assessors use to gauge the value of water rights, the most desirable kinds of water rights, and water markets. Further, the webinar covers both the law and economics of water right sales and transfers. Generally, topics will include:

- Real Estate Components and Value of Water Rights
 - Surface Water vs Groundwater Sales
 - How elements of a water right determine value
- The “Legal” Value of Water Use Types
 - Compare exempt uses, permits, certificates, and decreed rights and water use in “closed” basins
- Valuation of Water Rights
 - “Assessments” of the value of water rights
- Water Markets
 - The issues with developing water markets
 - Discussion of the Deschutes Groundwater Mitigation Program
 - Concurrency laws and water banking
