

Tui Anderson has been working in the municipal water and wastewater industry for the past 12 years. Mr. Anderson has assisted public water and wastewater systems with improving their GIS, reducing their water loss and I&I in American Samoa, Guam, Hawaii, Idaho, Wyoming, Oregon, Washington and Utah. Mr. Anderson has trained hundreds of system staff on a wide range of topics including conducting water audits, leak detection, I&I investigations and how to create a GIS. Mr. Anderson also founded Water Utility App LLC to help water systems, especially small systems, to perform water audits conforming to the latest AWWA/IWA standards.
