☒ Checking this Box confirms that I agree to be videoed and recorded for the duration of the Online Training/Webinar.

1. Speaker Biography (please provide one paragraph – 150 words or less)

Nathan leads HDRs desalination / membrane treatment practice group. Past projects include an industrial reuse project for a power plant; energy audits for drinking water plants and superfund sites in South Dakota; design of small system membrane treatment facilities, and design of a 22 MGD membrane filtration drinking water facility for Bozeman, Montana. Most recently, Nathan was design and commissioning manager for the first ceramic membrane drinking water treatment plant in the United States, which was designed to operate entirely by gravity.

2. Topic Title (please provide the topic title for your presentation)

Session Moderator.

3. Topic Abstract (please provide a minimum of 250 words for your presentation and describe how it relates to membrane technology)

Session Moderator.
