

“Introduction to Sanitary Surveys” workshop

Group A Public Water Systems (PWS) are regulated by the federal, state, and local regulations. A Sanitary Survey evaluates a water system's records, facilities, and processes to determine if conditions currently present a public health hazard or could potentially lead to future hazards. All WA Group A PWSs must submit to a sanitary system on an either 3 or 5 year schedule. With help of sanitary surveys public water systems can identify and address areas that currently or in the future may create a risk to public health protection.

In this workshop we will discuss the 8 components addressed during every routine Sanitary Survey:

1. Planning & management documentation
2. Operator certification status
3. Source & sanitary control area
4. Source pumps & pumping facilities
5. Source treatment procedures & equipment
6. Pressure tanks
7. Finished water storage
8. Distribution system and cross connection control program

In addition, we will explore how to prepare for a sanitary survey, respond to sanitary survey findings, report violations, and how to communicate with your regulator.

Date: October 20, 2020

Time: 9:00 am to 12:15 pm

Where: Live Online

CEUs: DW CEUs (WA, OR, NM)

WA Dept. of Health / Certification Services Course ID: 0.3 CEUs requested

NM UOCP: 3.0 Training Credits requested

OR OESAC Course ID: 0.3 CEU requested

Instructor: Erika [Schwender](#)

Fee: \$100

Registration: online: www.pro-train.org; phone: (360) 490-2426; email: erika@pro-train.org
