

the water communication (9/30) session was not technical/robust enough (watch a movie, discuss communication), but the Nutrients one on 10/28 looks fantastic. They asked for .5 CEUs, but the 10/28 session only has technical content for 3 hours, which is why I said they could attain .5 if they attended both days, not knowing at the time that they were separate events to register for. It was difficult to decipher the 6 summit schedule without the explanation.

So now we would approve .3 CEUs for the 10/28 session, but 0 for the 9/30 session (less than 3 hours of technical content, mostly about communication)
