

Virtual Chlorine Analysis for Drinking Water and Wastewater

Are you suffering from questionable chlorine results? Chlorine is the most popular disinfectant used in drinking water and wastewater applications but measuring it comes with a unique set of challenges. This course reviews the best practices for collecting grab samples for analysis, proper techniques for measuring free and total chlorine, troubleshooting common issues, and verifying instrument accuracy using standards.

Sampling and Analysis Presentation	30 minutes
Hands-on Instrument overview and operation Simple Chlorine test	30 minutes
Chlorine Disinfection Presentation	30 minutes
Hands-on Chlorine Lab -Free and total chlorine analysis - combined chlorine determination -Secondary standards	30 minutes
