

Turbidity Process Instrument Verification

This class will teach you the basics of turbidity process control. We will demo laboratory steps and techniques to make you feel confident in verifying your drinking water and wastewater turbidity process equipment including comparing it to lab and handheld instrumentation.

Turbidity Instrumentation 45 minutes

- Quick overview of turbidity
- Theory of TU5 and laser technology
- Theory of 1720e and its technology

Hands- on Laboratory 45 minutes

- 2100Q Verification
- TU5200/TU5400 Calibration and verification
