

"Current & Emerging Concerns for Water & Wastewater Operations" Live Online Workshop

In this **7 hour in-person workshop** we will explore current and emerging concerns as they relate to both drinking water and wastewater. We will discuss the historical background of current regulations and explore current as well as emerging concerns encountered by water & wastewater operations. Furthermore, we will explain a variety of regulatory tools used by the EPA to address these concerns, such as the Contaminant Candidate List (CCL) and Unregulated Contaminant Monitoring Rule (UCMR).

During this workshop we will address:

- PFAS
- Cyanotoxins
- Microplastics
- Viruses
- Naturally occurring toxins
- Micropollutants
- Pharmaceuticals and Personal Care Products (PPCPs)
- Method Update Rule (MUR)
