

Corrosion Control

Fee: \$30.

Training Contact Hours: 3

Description: Corrosion Control is a course that focuses on the importance of maintaining properly balanced water as well as various types of corrosion control methods for the protection of distribution systems.

Learning objectives: Students are taught the various methods and processes that are used to control corrosion and the importance of preventing corrosion in the water distribution system.

WT6 – Corrosion Control	
Section	Minutes
Corrosion Introduction video1	3
Lead & Copper Rule - Causes of Corrosion section1 – 46 slides	92
Effects of Corrosion video2	1
Corrosion Control through chemical addition section2 – 15 slides	30
Cathodic Protection video3	2
Cathodic Protection section3 – 8 slides	16
Conclusion video4	6
navigation 10m	10
questions 7	7
Total minutes	167
Contact Hours	3.0
