

2021 Biofest Conference

By: Northwest Biosolids

Course Outline:

Day 1

- Nutrients 101
- Carbon

Day 2

- Soil Health
- Epidemiology

Day 3

- PFAS

Day 4

- Restoration

Training Goal:

The proper management of biosolids plays a critical role in running a successful wastewater treatment program. Biosolids experts will present conference training sessions that focus on building a successful biosolids program, evaluating budget considerations, learning about program sustainability measures, the state of biosolids research, how PFAS legislation is impacting programs, building biosolids blends for specific markets and hosting a regulations forum that features a panel and interactive roundtables.
