

CMOM CEU COURSE DESCRIPTION 18 Hours

CAPACITY, MANAGEMENT, OPERATION, AND MAINTENANCE CEU TRAINING COURSE

Proper function of sanitary sewer systems is vital to protect public health, property, and waterways in the surrounding area. Most utilities have a management, operation, and maintenance (MOM) plan to ensure their system is in working order.

This CEU course is designed for the continuing education, knowledge, and enhancement of wastewater collection system operators, pretreatment/industrial wastewater operators, and wastewater treatment operators. The target audience for this course is the person interested in working in a wastewater treatment or collections facility, or for onsite operations and/or wishing to maintain CEUs for certification license or to learn how to perform their job safely and effectively, and/or to meet education needs for promotion. This is not a comprehensive wastewater treatment or collections manual.

This CEU training course reviews various wastewater collection methods and related capacity, management, operation, and maintenance (CMOM) subjects. This course is general in nature and not state specific, but contains different wastewater collection methods, rules, policies, electrical, pump, safety, operator certification, and lift station information. This information is essential to properly operate any wastewater collection system.

There are no prerequisites, and no other materials are needed for this course.

General Objectives

To provide eighteen hours of continuing education training in effective and efficient wastewater collection methods, cleaning, and general CMOM procedures and reporting.

Learning Objectives and Timed Outcomes

1. Wastewater collection rules and regulations, Clean Water Act and requirements, CMOM, and pretreatment related to collections, collection systems components, and related regulations – 340 minutes.
 - a. Compare the three categories of centralized sewer systems and their purposes.
 - b. Analyze the results of a recent clean water needs survey conducted by the USEPA.
 - c. Recognize responsibilities of collection system operators.
 - d. Evaluate the components of domestic wastewater.
 - e. Describe sewer mains, trunk lines, and collectors.
 - f. Identify common acronyms and associated full phrases.
 - g. Explain the purpose of clarified and expanded permit requirements under CWA and who is covered by this rule.
 - h. Summarize the CWA and list the two fundamental national goals.
 - i. Compare water quality before and after the CWA was enacted.
 - j. Describe the future goals of the CWA.
 - k. Define “SSO” and describe related problems.
 - l. Evaluate the purpose of MOM programs project.
 - m. List compounds and undesirable solids that disturb the treatment balance.
 - n. Describe the wastewater system collection process.
 - o. Compose a list of destructive compounds that should never be put into a sanitary sewer system.
 - p. Examine the list of solids and the harm they can cause.
 - q. Analyze the five leading causes of SSOs.

- r. Discuss the EPA's CSO Control Policy.
 - s. Outline the elements of a proper CMOM program.
 - t. Explain the steps in the self-audit process.
 - u. Explain the responsibilities of each of five groups in regards to pretreatment.
 - v. Identify two main functions of a sanitary sewer system.
 - w. Distinguish differences of gravity-flow sanitary sewers.
 - x. Analyze requirements, performance standards, and management programs under CMOM.
 - y. Explain the challenges of storm water management.
 - z. Summarize the National Pretreatment Program.
2. Purpose of wastewater collection systems and wastewater treatment – 20 minutes.
 - a. Define “wastewater.”
 - b. Explain the maintenance cycle of sewer systems.
 - c. Describe the importance of sewer line mapping and the information included on the maps.
 3. Wastewater collection processes, sewer cleaning, and maintenance procedures – 180 minutes.
 - a. Describe the costs associated with equipment damage and subsequent repairs and maintenance.
 - b. Evaluate the purpose of municipality self-assessments.
 - c. Outline important routine maintenance activities.
 - d. Describe the three manhole maintenance operations that are routinely performed.
 - e. Analyze the purposes of CCTV.
 - f. Identify successful methods of preventing overflows.
 - g. Examine WET and the two fundamental ways it is used in NPDES permits.
 - h. Assess the effectiveness of “lamping” and describe the process.
 - i. Explain the process for using dye at the manhole to determine velocity.
 - j. Recognize the purposes for sewer cleaning.
 - k. Compare the three major sewer-cleaning methods.
 - l. Contrast camera inspection and lamping.
 - m. State the objective of sewer rehabilitation and the three ways it is accomplished.
 - n. Compare two types of smoke used in testing.
 - o. Describe smoke-testing and list areas usually smoke tested.
 - p. Define dye-testing and describe when it is used.
 4. Common collection system problems – 55 minutes.
 - a. Explain SSOs and the reasons they occur.
 - b. List and describe problems that can cause SSOs.
 - c. Analyze the seriousness of the SSO problem.
 - d. Differentiate between SSOs and CSOs.
 - e. List health risks associated with SSOs and how people are exposed.
 5. Operations and components of pumps and lift stations, pump troubleshooting, and basic math and process control calculations – 280 minutes.
 - a. Describe vacuum sewer systems and list their applications and limitations.
 - b. Identify and explain the components of a vacuum sewer system.
 - c. Name the two types of pressure sewers and explain how they work.
 - d. Compare pressure sewers and gravity sewers.
 - e. Contrast lift stations and pumping stations.
 - f. List and describe the four main components of a lift station.
 - g. Compare centrifugal and vertical turbine pumps.
 - h. Explain how submersible pumps work.
 - i. Evaluate the two types of electric motors.

- j. Identify the purpose of reduced-voltage starters.
 - k. Compare the two types of totally enclosed motors and their applications.
 - l. Analyze the components of the four types of positive displacement pumps and how they work.
 - m. Recognize the formulas for calculating the different types of horsepower.
 - n. Examine the importance of motor controls and compare manual and automatic controls.
 - o. Contrast the characteristics of open and closed impellers.
 - p. Outline troubleshooting procedures for problems with pumps.
 - q. Summarize pump station inspection requirements and possible atmospheric hazards.
 - r. Assess the two main purposes of coupling alignment.
 - s. Compare advantages and disadvantages of flexible and rigid coupling and describe how to align them.
 - t. Outline steps for greasing bearings and changing motor oil.
 - u. Classify pumps according to their application.
 - v. Define BHP.
 - w. Analyze troubleshooting procedures and their effectiveness.
 - x. List components for a CMOM plan and the goals for a wastewater system.
6. Scenarios found in the sewer system and possible corrective measures – 80 minutes.
- a. Explain the difficulties with grease and steps to prevent problems.
 - b. Describe the importance of inspection and maintenance.
 - c. Analyze the problems caused by roots and grass inside sewers, types of pipes that are affected, and how to control growth.
 - d. Define corrective maintenance.
7. Benefits and requirements of a proper CMOM program, public concerns, impact assessments, knowledge of mapping techniques, and record-keeping practices – 385 minutes.
- a. Explain how SSOs can be eliminated.
 - b. List specific requirements for facilities under CMOM.
 - c. Describe required inclusions in an overflow response plan.
 - d. Discuss how system evaluations and capacity assurance plans work together and what they provide.
 - e. Analyze potential performance indicators.
 - f. Evaluate the importance of CMOM audits.
 - g. Outline the objectives of an effective CMOM program.
 - h. Investigate requirements for continuous training.
 - i. Evaluate the types of businesses subject to pretreatment regulations.
 - j. List three types of discharge standards that help achieve NPP objectives.
 - k. Recognize the eight categories of pollutant discharges that are prohibited.
 - l. Compare “interference” and “pass-through.”
 - m. Describe categorical standards and ELGs.
 - n. Outline the testing and inspection process for evaluating sewer system capacity.
 - o. Name and describe three techniques for monitoring flow rates.
 - p. Explain the purpose of flow monitoring plans and the information they should provide.
 - q. Separate the three components of flow measurement.
 - r. Analyze flow capacity.
 - s. Outline information provided on an accurate sewer cleaning record.
 - t. Discuss the importance of inventory records, and what information should be recorded.
 - u. Describe the owner’s responsibilities in regards to spare parts inventory.
 - v. Identify infiltration/inflow (I/I) and its impact.
 - w. List methods for identifying I/I sources.
 - x. Define SSES.

- y. Summarize the importance of visual inspections of manholes and pipelines.
- z. Compare planned and unplanned maintenance.

Course Training/Assessment Needs Methodology

Technical Learning College identified training/assessment needs by placing identifying them in two categories; internal and external.

Beta Course Training/Assessment Short Survey

1. The difficulty of your course.

Very Easy 0 1 2 3 4 5 Very Difficult

2. Please rate the difficulty of the testing process.

Very Easy 0 1 2 3 4 5 Very Difficult

3. Please rate the subject matter on the exam to your actual field or work.

Very Similar 0 1 2 3 4 5 Very Different

Specific Course Goals and Timed Outcomes (Beta Testing)

Sixty-seven students were tested and the average time necessary to complete each task was recorded in the above objectives and timed outcome section. In the above timed outcome section area, the tasks were measured using times spent on each specific objective goal and final assignment grading of 70% and higher.

Originally one hundred and one students were given a task assignment survey in which to track their times on the above learning objectives (course content) while utilizing a multiple choice style answer sheet to complete their final assignment. All students were given 60 days to complete this assignment and survey. Rusty Randall, Proctor October 7, 2004, London, Ohio MACI.

Beta Testing Group Statistics

After soliciting one hundred and one qualified students for this assignment, beta testing was implemented. All the qualifying students held wastewater collection or wastewater treatment positions. The average education age of the students was the tenth grade. None of the test group received credit for their assignment.

The average times were based upon the outcome of sixty-seven successful students. Thirty-four students did not complete or failed the course. The average related work experience of this group was 16 months.

Our best professional judgment is that this is an easily completable course for the beginning to intermediate level of certified operator. The average completion time was 19.2 hours with an average successful score of 81%. We are asking for 18 hours of continuing education credit.

Task Analysis and Training Needs Assessment Process Information Gathering

Task Analysis and Training Needs Assessments have been conducted to determine or set Needs-To-Know for the basis of TLC's continuing education courses. The following is a listing of some of those who have conducted extensive valid studies from which TLC has based the continuing education program upon: the Environmental Protection Agency (EPA), the Arizona Department of Environmental Quality (ADEQ), the Texas Commission of Environmental Quality (TCEQ), Pennsylvania Department of Environmental Protection (PDEP) and the Association of Boards of Certification (ABC).

TLC has primarily used Training Provider Manual for the Pennsylvania Water and Wastewater System Operator Training Program for course goal setting and learning objectives for all three training formats; conventional classroom, distance paper based and web based training.

The titles or names of subjects (Learning Objectives) may be changed for readability purposes. Some of the terms used in this document may be part of a copyrighted adult learning assessment process and in these cases, we utilize generic terminology. The needs assessment/survey maintains our training and education materials criteria. Assessments and changes are performed based on changes in technology, evaluations of the students, regulatory changes and editorial corrections. Most of this information is considered intellectual property and may not be owned by TLC but by third parties. All of TLC's information is proprietary.

ADDIE

TLC utilizes a five-phase instructional design model consisting of Analysis, Design, Development, Implementation, and Evaluation for our continuing education courses. Each course design step has an outcome that feeds into the next step in the sequence. The five phases of ADDIE are as follows:

ANALYSIS

During the Training Needs Assessment Process Information Gathering Analysis phase, the course designer(s) (see Subject Matter Experts and Contributing Editors) identifies the learning need, the goals and objectives, the student's needs, existing knowledge, Course Statement of Need, and any other relevant characteristics (State or Federal Need-to-Know) and to ensure that students are learning what is relevant for their job.

DESIGN

This is the systematic process of specifying learning objectives from the Training Needs with a focus on Bloom's Taxonomy. A detailed storyboard following the Needs Assessment/Survey and/or Course Statement of Need will determine the course content.

DEVELOPMENT

The actual creation (production) of the training content will begin based upon the Design phase using Bloom's Taxonomy. At this time, a decision is made to proceed or table the course.

IMPLEMENTATION

During implementation, the Alpha testing plan is put into action and a procedure for course and/or assessment revision is implemented. These course materials and assessments are delivered or distributed to the student group. After delivery, the effectiveness of the training materials is evaluated in Beta testing phase. All of our courses have extensive Alpha and Beta testing to ensure job relevancy, correct information and course learning objectives are met.

EVALUATION

This phase consists of (1) formative and (2) summative evaluation from Alpha and Beta testing. Formative evaluation is present in each stage of the ADDIE process. Summative evaluation consists of tests designed for criterion-related referenced items and providing opportunities for feedback from the students and proctor. **Ongoing Course Evaluation:** Administrative and instructional staff will collect all student concerns (verbal, written and surveys) and distribute these to TLC Administrative personnel for evaluation and course corrections. Course and/or Assessment revisions are made as necessary.

Precept-Based (Micro-Learning) Training Course

TLC's training courses are based upon a form of induction training, made of topical and technical precepts that are discovered in the Needs Assessment/Survey and/or Training Needs Assessment Process Information Gathering. The training topics or learning objectives are made up of "micro-content" or "precepts"— or small chunks of information that can be easily digested. These bite-size pieces of technical information are considered to be one of the most effective ways of teaching students new or important information (regulatory or technical) because it helps the mind retain knowledge easier.

Micro-learning or precept-based training doesn't rely on the student to process a large amount of information before breaking it down. Our method includes short modules with clearly defined learning goals for each section. This method allows a student to hone in on a particular skill, then given the opportunity to exhibit their knowledge in the final assessment (assignment).

Course Training/Assessment Needs Methodology

Technical Learning College identified training/assessment needs by placing identifying them in two categories; internal and external.

Internal Methods include:

- ✓ Observation
- ✓ Interviews
- ✓ Instruments: Perception instruments and Knowledge based assessments
- ✓ Student records and reports
- ✓ Group problem analysis (Classroom or Seminars)
- ✓ Performance or Survey appraisals

External Methods include:

- ✓ Outside consultants (Completion)
- ✓ Government Certification Reviews (Training Needs)
- ✓ Records and reports from other agencies

The needs assessment/survey maintains our training and education materials criteria. Assessments and course material changes are performed based on changes in technology, evaluations of the participants and regulatory changes. Materials are assessed yearly or as needed to insure course integrity.

Course Author Melissa Durbin

This course was co-authored by Melissa Durbin; she has over 25 years of water and wastewater treatment teaching experience as a college instructor. Melissa has written the several nationally accepted water and wastewater treatment manuals since 2001. Melissa has taught approximately 10,000 students about water/wastewater treatment, disinfection and related classes. She will be available to answer questions relating this course.

Extensive Academic Research

Technical Learning College's (TLC's) continuing education course material development was based upon several factors; field experience working in the water quality field, extensive academic research (teaching in the community college system), advice from subject matter experts (State officials and industry leaders), data analysis, task analysis and training needs assessment process information gathered from other states.

Both Melissa and Jeff Durbin are the two primary Instructors, Subject Mater Experts and Technical Writers have trained and/or certified more than ten thousand students. These two Instructors teach on a daily basis in a classroom setting throughout Arizona and on-line to students nationwide. See below for more information.

Advice from Subject Matter Experts

Both Melissa and Jeff Durbin are professional trainers and have been educated in current trends in professional education and continuing education needs.

Primary Course Designers Melissa and Jeff Durbin

Melissa Durbin

This course was co-designed by Melissa Durbin; she has over 25 years of teaching water and wastewater treatment experience as a college instructor. Melissa has written the several nationally accepted water and wastewater treatment manuals. Melissa has taught approximately 10,000 students about water and wastewater treatment and related classes. She will be available to answer questions relating this course.

Jeff Durbin

This course was co-designed by Jeff Durbin, over 10 years of water and wastewater treatment experience as a backflow inspector for the City of Phoenix and 20 years of water and wastewater treatment experience. Jeff has taught approximately 10,000 students about water and wastewater/collections, and pollution control (water quality) related classes. Jeff will also be able to answer any question pertaining to this course.

Course Compiler

Peter Easterner, Detail-oriented technical writer/technical editor/desktop publisher/copy editor. 20 years' experience editing and writing feasibility and trade-off studies, test procedures, specifications, user manuals, company policies, HR forms, and ISO-9000 documents. Exceptional grammatical/written communication skills. "Go-to" person for Microsoft Word, Outlook, and general computer questions. Internet Webmaster Certificate (including HTML)

Contributing Editors

James L. Six Received a Bachelor of Science Degree in Civil Engineering from the University of Akron in June of 1976, Registered Professional Engineer in the State of Ohio, Number 45031 (Retired), Class IV Water Supply Operator issued by Ohio EPA, Number WS4-1012914-08, Class II Wastewater Collection System Operator issued by Ohio EPA, Number WC2-1012914-94

Joseph Camerata has a BS in Management with honors (magna cum laude). He retired as a Chemist in 2006 having worked in the field of chemical, environmental, and industrial hygiene sampling and analysis for 40 years. He has been a professional presenter at an EPA analytical conference at the Biosphere in Arizona and a presenter at an AWWA conference in Mesa, Arizona. He also taught safety classes at the Honeywell and City of Phoenix, and is a motivational/inspirational speaker nationally and internationally.

James Bevan, Water Quality Inspector S.M.E. Twenty years of experience in the environmental field dealing with all aspects of water regulations on the federal, state, and local levels. Experience in the water/wastewater industry includes operation of a wastewater facility, industrial pretreatment program compliance sampling, cross-connection control program management, storm water management, industrial and commercial facility inspections, writing inspection reports for industry, and technical reports per EPA permit requirements. Teacher and Proctor in Charge for Backflow Certification Testing at the ASETT Center in Tucson for the past 15 years and possess an Arizona Community College, Special Teaching Certificate in Environmental Studies. Extensive knowledge and experience in college course and assignment/assessment writing.

Dr. Pete Greer S.M.E., Retired biology instructor, chemistry and biological review.

Jack White, Environmental, Health, Safety expert, City of Phoenix. Art Credits.

Ongoing Course Evaluation

Administrative and instructional staff will collect all student concerns (verbal, written and surveys) and distribute these to Jeff Durbin and Bubba Jenkins for evaluation and course corrections.

Course Procedures for Registration and Support

All of Technical Learning College's distance learning courses have complete registration and support services offered. Delivery of services will include e-mail, web site, telephone, fax and mail support. TLC will attempt immediate and prompt service. When a student registers for a correspondence course, he/she is assigned a start date and an end date. It is the student's responsibility to note dates for assignments and keep up with the course work. If a student falls behind, he/she must contact TLC and request an end date extension in order to complete the course. It is the prerogative of TLC to decide whether to grant the request.

All students will be tracked by a unique computer generated number assigned to the student. Some students will be tracked and reported by their operator ID for Pennsylvania, Texas and New York.

Disclaimer and Security Notice

The student shall understand that it their responsibility to ensure that this CEU course is either approved or accepted in my State for CEU credit. The student shall understand and follow State laws and rules concerning distance learning courses and understand these rules change on a frequent basis and will not hold Technical Learning College responsible for any changes. The student shall understand that this type of study program deals with dangerous conditions and will not hold Technical Learning College, Technical Learning Consultants, Inc. (TLC) liable for any errors or omissions or advice contained in this CEU education training course or for any violation or injury caused by this CEU education training course material. The student shall contact TLC if they need help or assistance and double-check to ensure my registration page and assignment has been received and graded.

Student's Identity, Attendance, and Participation Verification

A proctoring report and/or computer-tracking program validates proper identity, attendance and participation. The student shall submit a driver's license for signature verification and track their time worked on the assignment. The student shall also sign an affidavit verifying they have not cheated and worked alone on the assignment. We follow up with telephone confirmation and/or quiz review assessment. All student attendance is tracked on TLC's student attendance database.

Teaching Techniques and Assessment Tools

Our training courses are based upon a form of induction training, made of topical and technical precepts. The training topics are made up of "micro-content" or "precepts"— or small chunks of information that can be easily digested. These bite-size pieces of technical information are considered to be one of the most effective ways of teaching people new information because it helps the mind retain knowledge easier. Micro-learning or precept-based training doesn't rely on the student to process a large amount of information before breaking it down. Our method includes short modules with clearly defined learning goals for each section with a post quiz and a final assessment (quiz). This method of pre-quiz allows a student to hone in on a particular skill, then given the opportunity to exhibit their knowledge in the final assessment.

Educational Learning Objective Topics

The CEU course covers several educational topics/functions/purposes/objectives. The topics listed are to assist in determining which educational objective or goal is covered for a specific topic area. This information is available in the detailed beta-testing information and may be found in the course's table of contents. The titles or names of subjects may be changed for readability purposes.

TLC Contact Information

All instructors and administrative staff are obligated to respond within 1 day by email, snail mail or telephone providing proper guidance to successfully complete the assignment. Email and telephone inquiries are handled quickly, generally within 2 hours of the call. We encourage students to complete their work with less frustration and fewer delays by calling or e-mailing us for any concern. We attempt to provide direct interaction similar to conventional classroom training.

Student Information Personal Data Security Procedures

All information regarding the student is strict and privileged only. This information is held in secure databases and is not sold or provided to any one unless the student requests a copy or a State agency does an audit. Even during audits, we restrict confidential information unless the Agency can provide a legitimate excuse. Some of this security information and data is priority and details are not provided. Students are not provided with any passwords at this time.

Certificate of Completion

TLC will offer the student either pass/fail or a standard letter grading assignment. If TLC is not notified, the student will only receive a pass/fail notice. In order to pass your final assignment, you are required to obtain a minimum score of 70% on your assignment. The certificate of completion will have all text in capital letters and there is a water mark of the Technical Learning College in three colors along with anti-counterfeiting security measures on the edge of the certificate. An electronic copy is assigned to the student's electronic record with issue date.

Security and Integrity

All students are required to do their own work. All lesson sheets and final exams are not returned to the student to discourage sharing of answers. Any fraud or deceit and the student will forfeit all fees and the appropriate agency will be notified. A random test generator will be implemented to protect the integrity of the assignment.

Student Assistance

The student shall contact TLC if they need help or assistance and double-check to ensure my registration page and assignment has been received and graded.

Final Examination for Credit

Opportunity to pass the final comprehensive examination is limited to three attempts per course enrollment.

Instructions for Written Assignments

The CMOM CEU Training course uses a multiple-choice answer key.

Required Texts

The CMOM CEU course CEU training course comes complete, no other materials are necessary.

ADA Compliance

TLC will make reasonable accommodations for persons with documented disabilities. Students should notify TLC and their instructors of any special needs. Course content may vary from this outline to meet the needs of this particular group.

Feedback Mechanism (Examination Procedures)

Each student will receive a feedback or survey form as part of his or her study packet. The student will be able to find this form in the front of the assignment or lesson(assessment). The student can e-mail, snail mail or telephone TLC for any concern at any time.

Student Concerns

Most of student/training course related concerns are generally answered within 2 hours but not more than 24 hours. TLC has three support staff administrators with computers and telephones and have excellent communication and computer skills and able to respond and track all students and obtain or submit required forms and assignments. TLC has a dedicated computer student tracking system database that is backed-up on a daily bases and this information is secured and stored at a secure offsite location in case of fire or security problems. All student website information is tracked and documented for security measures.

Recordkeeping and Reporting Practices

TLC keeps all student records for a minimum of five years. It is the student's responsibility to give the completion certificate and/or paperwork to the appropriate government agencies. If necessary, we will electronically submit the required information to New York, Colorado, Texas, Indiana, Pennsylvania and any other required state for your certification renewals.

TLC Record Storage

TLC's training records include the following elements:

1. Individual course training (assessment) and registration page (Customer Order Record) is recorded in Excel format and the hard copies are scanned and stored in a computer database for 5 years and include the following:
 - a. the instructor(s) who taught each session on that date the of the training session or grading was offered (in comments section registration page) as well as which instructor was considered to be the lead instructor(s) and by the Director.
 - b. the name of the instructor(s) and facilitator(s) who proctored and/or graded the examination for each training session if applicable (in comments section registration page);
 - c. the attendance sign-in sheet(s) (registration page) for each training course or session;
 - d. all graded and dated validated examination answer (Assessment) sheets for each examination attempt including an explanation (written in comments and/or Excel list) for any retests as well as a narrative explaining any assistance provided to the attendee before the re-test; and
 - e. session evaluation(survey)forms (in comments section registration page and or Excel list).

Grading Criteria

TLC offers students the option of either pass/fail or assignment of a standard letter grade. If a standard letter grade is not requested, a pass/fail notice will be issued. Final course grades are based on the total number of possible points. The grading scale is administered equally to all students in the course. Do not expect to receive a grade higher than that merited by your total points. No point adjustments will be made for class participation or other subjective factors. For security purposes, please fax or e-mail a copy of your driver's license and always call us to confirm we've received your assignment and to confirm your identity.

Final Assignment

The final examination assignment is determined by the examination administrator or the instruction and there are generally three versions that are readily available. There are also three levels of the examination from average, (5 Answers) Difficult (5 +All of the above) and very difficult (Six answers and All of the above). The student is provided the average rated examination unless

there is a condition or concern that requires a more difficult examination. Example, two or more students at the same address or any suspicion of cheating or potential fraud. We try to ensure the security and learning experience. Assignments/answer keys are only accessible to instructors and administrative staff that have a need to know clearance.

Failure

If the student fails the examination, they are provided with two more chances to successfully pass the exam with a score of 70% or better. The student may receive a different and randomly generated exam. Upon failure of an exam, the student can submit their concerns in writing or submit a survey form and has the option to receive instructor assistance that would be equivalent to conventional classroom assistance in discovering the areas that are deficient. The instructor has the option in describing the assistance method or procedure depending upon the student's deficiencies.

Grading Criteria

TLC will offer the student either pass/fail or a standard letter grading assignment.

- A 900 – 1000 points
- B 800 – 899 points
- C 700 – 799 points
- D 600 – 699 points
- F <600 points

In order to successfully pass this course, you will need to have 70% on the final exam. The entire assignment is available on TLC's Website in a Word document format for your convenience.

Forfeiture of Certificate (Cheating)

If a student is found to have cheated on an examination, the penalty may include--but is not limited to--expulsion; foreclosure from future classes for a specified period; forfeiture of certificate for course/courses enrolled in at TLC; or all of the above in accordance with TLC's Student Manual. A letter notifying the student's sponsoring organization (State Agency) of the individual's misconduct will be sent by the appropriate official at TLC. No refund will be given for paid courses. An investigation of all other students that have taken the same assignment within 60-day period of the discovery will be re-examined for fraud or cheating. TLC reserves the right to revoke any published certificates and/or grades if cheating has been discovered for any reason and at any time. Students shall sign affidavit agreeing with all security measures. The student shall submit a driver's license for signature verification and track their time worked on the assignment. The student shall sign an affidavit verifying they have not cheated and worked alone on the assignment.

Proctoring Instructions

Students enrolled in Technical Learning College's CEU courses that require proctored testing and **who do not live in the physical service area** of the Technical Learning College Test Center must nominate and gain prior approval of a proctor who will monitor course tests. A new proctor nomination form is required for each term and for each class.

PROCTORS, If Necessary...

A proctor is an individual who agrees to receive and administer a student's test(s) from Technical Learning College at the proctor's business email address. The test(s) will be ethically and professionally administered in a suitable testing environment (e.g., college/library or professional office). The proctor will return the test(s) to the Technical Learning College Test Center via fax

immediately after administration, and the proctor will mail the exam within one (1) work day of administration to the Technical Learning College Test Center.

Proctors certify in writing to the Technical Learning College Test Center that the student completed the test according to all of the specific directions provided in the proctor guidelines letter. As the Proctor Nomination Form indicates, the student will identify the specific test(s) the proctor will monitor.

Any proctor the student nominates must be acting in the official capacity in one of the following positions:

- **College or University Personnel:** Dean, Department Chair, Student Records, Professional Staff Member of an adult/continuing education office or counseling center, Librarian, Professor, or any official testing center personnel if the tests are administered in the center.
- **Armed Forces Education Office Personnel**
- **Public or Private School Personnel:** Superintendent, Principal, Guidance Counselor, or Librarian.
- **Other:** Civil Service Examiner, Librarian for City/County, HR Professional, or Education/Training Coordinator.

The following persons do not qualify as proctors:

- **Co-workers, someone who reports to you or your immediate supervisor**
- **Friends**
- **Neighbors**
- **Relatives**

Nominating a Proctor

Students are responsible for identifying, nominating, and making all of the arrangements for the proctoring of their course tests, including the payment of any fees for services and the return of test materials to Technical Learning College Test Center (cost of FAX or postage). The proctor must be able to receive the student's test(s) via email as attachments. The Technical Learning College Test Center does not accept Yahoo, AOL, G-mail, Hotmail, or etc. email addresses.

If the student is unable to find a suitable proctor, they must contact the Technical Learning College Test Center for assistance immediately via email.

Proctor Nomination Form

Students will use the Proctor Nomination Form for nomination and approval of a proctor. The student will complete the top part of the form for each course s/he is taking, even if the same proctor is used for all tests. The student must click on the submit button for the data to be electronically transmitted to the Technical Learning College Test Center.

Disclaimer Notice

It is ultimately the student's responsibility to ensure that this CEU course is either approved or accepted in my State for CEU credit. The student shall understand State laws and rules change on a frequent basis and believe this course is currently accepted in their State for CEU or contact hour credit, if it is not, the student shall will not hold Technical Learning College responsible. The student shall also understand that this type of study program deals with dangerous conditions and that the student shall will not hold Technical Learning College, Technical Learning Consultants, Inc. (TLC) liable for any errors or omissions or advice contained in this CEU education training course or for any violation or injury caused by this CEU education training course material. The

student shall will call or contact TLC if help or assistance is needed and double-check to ensure the registration page and assignment has been received and graded.

Affidavit of Exam Completion

The student shall affirm that they alone completed the entire text of the course. The student shall affirm that they completed the exam without assistance from any outside source. The student shall understand that it is their sole responsibility to file or maintain their certificate of completion as required by the state.

Refund Policy

We will beat any other training competitor's price for the same CEU material or classroom training. Student satisfaction is guaranteed. We will refund course fees if the course is not accepted for credit by the State. Otherwise, any other problem will be given an exchange credit towards an acceptable or approved course for the State. Once we are notified of the refund or exchange, we will generally issue a refund in 30 days of the problem and exchange within the same day.

Mission Statement

Our only product is educational service. Our goal is to provide you with the best possible education service possible. TLC will attempt to make your learning experience an enjoyable opportunity.

The student is required to submit the following information for assignment grading...

6. TELEPHONE CONFIRMATION

When the Student finishes this course...

At the conclusion of this course:

At the successful completion of this course, you (the student) should be able to explain and describe effective and efficient wastewater collection methods, cleaning, and general CMOM procedures and reporting.

Mission Statement

Our only product is educational service. Our goal is to provide you with the best possible education service possible. TLC will attempt to make your learning experience an enjoyable opportunity.

Educational Mission

The educational mission of TLC is:

To provide TLC students with comprehensive and ongoing training in the theory and skills needed for the environmental education field,

To provide TLC students with opportunities to apply and understand the theory and skills needed for operator certification,

To provide opportunities for TLC students to learn and practice environmental educational skills with members of the community for the purpose of sharing diverse perspectives and experience,

To provide a forum in which students can exchange experiences and ideas related to environmental education,

To provide a forum for the collection and dissemination of current information related to environmental education, and to maintain an environment that nurtures academic and personal growth.

Melissa Durbin, Author and Dean of Instruction.

30 years' experience in wastewater collections along with 18 years of college instruction. I have taught this course to hundreds of students and still learn more each day about collections systems. Call me or any of the other Instructors for course assistance. I welcome your input and comments and hope you enjoy this course.
