Scott Berry

OAWU Circuit Rider

sberry@oawu.net

SPEAKER CREDENTIALS

(Short paragraph describing background, education, experience, etc.)

Scott Berry has been employed by the Oregon Association of Water Utilities since 2004 as a Training Specialist, Circuit Rider/Programs Manager. In this capacity, Scott was tasked with providing training and technical assistance to many utilities in Oregon. Scott has additional experience as the Manager of Luckiamute Domestic Water Cooperative. LDWC is a geographically large system with a distribution area of over 265 square miles. He worked as an operator in Iraq where he provided the U.S. military bases as well as native towns and villages with much the same service as provided by OAWU. In Iraq he gained experience as a Reverse Osmosis Water Treatment Plant Operator as well as troubleshooting, maintaining, and installing water distribution systems. Additionally, Scott has been involved and trained with the local Fire Department and County Sheriff's office in all aspects involving emergencies and hazardous operations.

Scott Berry via email Signature on file.

Email: steve@cimcosales.com

SPEAKER CREDENTIALS

(Short paragraph describing background, education, experience, etc.)

A native to the Pacific Northwest United States, Steve has spent the past 13 years working in water management for irrigation, waterworks, and construction projects. As an environmental consultant for 4 years in the Arizona deserts, he worked with most major home builders during the housing boom of 2003-2008 to control sediment, pollutants, and erosion which lead to contamination of desert waterways and ground water during construction. As a current consultant with CIMCO, an independent representative firm in the Pacific Northwest and Canada, Steve continues to source conservation innovations for water distribution and irrigation. Over time, Steve has noticed a perception that control valves are very complicated. This is not the case. His introductory training will help operators understand the basics with the hope (as they continue their training) that they will become comfortable managing control valves on a daily basis. Steve resides in Vancouver, WA and especially loves the rainy winters in the Pacific Northwest where he enjoys navigating the raging rivers, creeks, and waterfalls in his kayak.

Name: Jim Shaver

Employer: PACE Engineers, Inc.

Address: 5000 Meadows Road, #345 - Lake Oswego, OR 97035

Phone: 503.597.3222

Email: jims@paceengrs.com

SPEAKER CREDENTIALS (Short paragraph describing background, education, experience, etc.)

Jim Shaver has 26 years of professional experience in civil engineering and is a licensed Civil Engineer in both Oregon and Washington. He is a 1986 graduate of the University of Portland with a Bachelor of Science in Civil Engineering and at the time of beginning his engineering career was two classes short of an Associate Degree in Water Quality Technology from Clackamas Community College. He has provided civil engineering services for many types of public projects, from design inception through construction completion. His ongoing and past work with local Cities and Special Service Districts include facilities planning, hydraulic modeling, design, and project engineering during construction and contract administration. Jim has designed and managed numerous water system projects covering all aspects of water system engineering for his clients. He is a Principal Engineer with PACE Engineers, Inc. in their Lake Oswego office. In his off time, he enjoys outdoor and other activities where there is no smart phone service.

Title and Length of Class:

"Everyone can be an Asset Manager" (1.5 – 2.0 hours)

Description of Class:

Class will discuss with attendees how performing your daily duties can lead to a suggestive approach to maintenance management of major assets as a key to successful operation of a water utility. By stepping through the "normal" day of an operator we will show how you can develop a prioritization list of system components, mandatory preventative maintenance schedules, repairs, and needed replacements for the sustainability of the system as a whole that can be used for informing managers and directors, as well as providing periodic reminders for operations staff.

Name: Lewis Titus

Employer: Titus Industrial Group Inc.

Address: 1450 N.W. Gardner Rd., Prineville, OR 97754

Phone: 541-389-1975

Email: lewis@titusig.com

<u>SPEAKER CREDENTIALS</u> (Short paragraph describing background, education, experience, etc.)

Lewis Titus provides over three decades of vast experience in the maintenance, pipeline and wastewater industries. His career has included eighteen years as a Millwright in the wood products industry; nine years as a high pressure, large diameter, natural gas pipeline maintenance technician for Pacific Gas & Electric; and seven years in a heavy maintenance apprenticeship with extensive experience in corrosion control.

In 2000 Mr. Titus launched his own company, Titus Industrial Group Inc (TITUS), specializing in offering solutions for the wastewater industry. The TITUS line of products addresses common industry problems such as corrosion, odor, sludge, efficiency, safety, and security. Over the years, Mr. Titus has worked with public works agencies, industrial customers, civil engineers, contractors, and precast concrete manufactures, providing new technologies, and better construction techniques to solve problems from the top of the manhole to the wastewater treatment plant.

Mr. Titus has been instrumental in the research, development, design and engineering of numerous patented products including the TITUS® Twister® Mixing Aerator, TITUS® Twister® FL Floating Aerator and the TITUS® TwistLift® Security Lock for access covers.

Mr. Titus has extensive experience with large projects including pipelines, pump stations, and wastewater treatment plants. As a consultant for Solmax (GSE) Studliner, one of his projects, the Borragas Avenue trunk sewer in Sunnyvale, California, was voted number one in the nation for underground precast structures by the National Precast Concrete Association.

Mr. Titus' broad understanding of advanced oxidation processing, aeration and mixing systems, for new and existing systems, spans hundreds of applications in wastewater treatment plants, lagoons, pump stations, and infrastructure projects.
