

Practical Ideas for Water & Wastewater Operations

The pages of *Opflow*, AWWA's award-winning operations publication, come to life this November as the OpShow! This two-day virtual event is focused on providing practical ideas for water and wastewater system operations, with topics ranging from utility case studies to technology solutions. Thanks to generous sponsor support, OpShow will be offered free to all AWWA members, providing an unprecedented opportunity to engage, share best practices, and discover practical solutions for continuous improvement.
